

# Spotlight on: Infectious diseases

Friday 10 - Saturday 11 February 2012 • Venue: Royal Society of Medicine, London  
CPD: 5 credits (applied for)

ORGANISED BY THE ROYAL SOCIETY OF MEDICINE  
IN ASSOCIATION WITH THE BRITISH SOCIETY FOR  
IMMUNOLOGY

The meeting will highlight current issues on infectious diseases and bridge animal and human health.

Exploring recent developments on immunology, epidemiology, public health and clinical aspects of infectious diseases.

The conference will provide a forum for interdisciplinary discussion of:

- vaccines for infectious diseases
- genetic susceptibility to infectious diseases
- public health implications in relation to access to medicines and vaccines

## Guest speakers include:

- Helen McShane, Professor of Vaccinology, Jenner Institute, University of Oxford
- David Heymann, Chairman of the UK Health Protection Agency and Head of Chatham House Centre for Global Health Security
- Andy Pollard, Professor of Paediatric Infection and Immunity, Jenner Institute, University of Oxford
- Geraldine Taylor, Senior Investigator, Jenner Institute and Institute for Animal Health for Avian Influenza, Veterinary Laboratories Agency
- Ian Brown, Head of Avian Virology and Director of the OIE/FAO/EU, International Reference Laboratory

## 2 day rates:
