

## Course venue

We are proud to host our course on Tropical Paediatrics and Global Child Health at the castle “**Schloss Rauischholzhausen**” (<http://schloss.faber-management.de/rauischholzhausen>), a historical site liaising with the University of Gießen, as a unique and yet reasonably priced venue.

The castle offers numerous seminar rooms of different sizes and a main lecture hall, which is well suited for teaching and learning in small interactive group sessions.

Participants will be accommodated in single or double bedrooms from Sunday night until Friday morning with all meals included thus cutting down on time spent for transport and enhancing the networking experience. The beautiful surroundings of the castle invite for relaxing walks or some morning work-out.

### Banking Details:

Gesellschaft für Tropenpädiatrie und Internationale Kindergesundheit (GTP)

Volksbank Ahlen-Sassenberg-Warendorf

IBAN: DE52 2501 1102 1632 01

BIC: GENODEM1AHL

The GTP has been founded in 1982 and has been known as ATP (German Association of Tropical Paediatrics) until 2014 before undergoing a name change to better reflect its focus on international child health as a clinical and scientific society. The GTP closely collaborates with the German Society for Child and Adolescent Health (Deutsche Gesellschaft für Kinder- und Jugendmedizin e. V.) and has been registered as a charity organization since 2003.

It aims at a close cooperation with national and international organizations dealing with issues in the field of international child and adolescent health in low and middle income countries. The society is engaged in research, teaching and clinical projects.

## Registration

Fees (including meals, coffee breaks & accommodation)

	Member of GTP or ESPID	Not a member of GTP or ESPID
Early bird	700 €	800 €
Regular Fee	800 €	900 €
Early bird registration deadline: 30.11.2016

# Intensive Course on Tropical Paediatrics and Global Child Health

30<sup>th</sup> Jan - 3<sup>rd</sup> Feb. 2017  
near Gießen, Germany

[www.tropenpaediatric.de](http://www.tropenpaediatric.de)

## Target Group

This intensive course addresses medical personnel of all specialties interested in international child health with focus on resource limited countries.

We prepare participants to perform in different social, cultural and political contexts and to deliver adequate care in resource limited settings.

We give an update on recent global data regarding international child health as well as on typical paediatric diseases in the tropics and subtropics.

The theoretical knowledge acquired during the lectures is applied in practical group work. Furthermore political challenges in international developmental aid are addressed.

*“The most motivating and highly informative course I have ever attended”*

*“The practical sessions were great”*

## Lecturers and Course Content

The entire course is taught by international medical professionals with working experience in a variety of international and national projects and countries.

Theoretical content is underlined by specific and personal practical examples from the field.

We organized the seminars and accommodation to be allocated in the same venue for more interaction and experience exchange.

**Course language:** English

*“the international guests give authentic insight”*

## Preliminary Course Schedule

### Monday

- Global Child Health
- WHO Programmes
- Organizing a paediatric department
- Global players in International Health
- Psychosocial aspects of International Health
- Overview and history of tropical medicine
