ESPID-Biomerieux Small Grant Award on Diagnostics

In order to be eligible for this award, proposals must fulfil one or more of the following criteria; in addition preference will be given to those criteria higher up the list.

- Impact of syndromic testing in diagnostics of Pediatric Infectious Diseases
- Research directed at clinical management of pediatric infectious diseases with use of molecular syndromic testing
- Clinical research on diagnostics stewardship and rapid multiplex infectious diseases testing
- Research that demonstrates the role of syndrome-based infectious disease testing and the potential it has to impact patient care
- Research with the goal of improving the role of PCR-based diagnostics in the treatment of pediatric infectious diseases
- Health Services/Systems Research with the goal of improving the efficiency and effectiveness of healthcare delivery due to use of syndromic infectious disease testing in pediatric population.
- Research that demonstrates progress toward improving diagnosis of pediatric infectious diseases with molecular testing

Please note that funding will not be provided for diagnostic test development, and any such applications will be considered ineligible.
